### Description

The Janus line of Terminus Plug-In modems are footprint compatible, GPS enabled, plug-in terminals for use in GSM/GPRS, EDGE, CDMA, HSPA+, EV-DO communication networks, and also Wi-Fi connectivity. They were specifically designed to provide customers with cost effective products that are easily integrated into new and existing designs, require limited customer certification resources, and are completely interchangeable to allow for maximum network flexibility while removing the worry of product obsolescence.

The Plug-In Terminus CDMA864CF is a dual band, CDMA-1xRTT wireless communication modem specifically designed for worldwide M2M network deployment.

Easily integrated into any new or existing hardware applications via its standard DIP pin configuration, the CDMA864CF is a cost-effective solution for CDMA M2M connectivity. Users can choose to mount the CDMA864CF directly onto their PC Board or simply mount in a DIP socket or header.
