CF Socket Modem Series LTE910CF CAT1 Embedded 4G Cellular Modem

Description

The Janus line of Common Footprint (CF) Socket Modems are footprint compatible, embedded cellular devices for use in LTE communication networks. They were specifically designed to provide customers with cost effective modules that are easily integrated into new and existing designs, require limited customer certification resources, and are completely interchangeable to allow for maximum network flexibility while removing the worry of product obsolescence.

The **AT&T LTE910CF v7.00** Common Footprint (CF) Socket Modem is an LTE Category 1 PTCRB and Carrier certified 4G cellular modem. They utilize the Telit LE910-NA1 module as their cellular engine. The LTE910CF v7.00 units operate in LTE bands (B13), (B12), (B5), (B4) and (B2), with fallback to HSPA+ networks as needed. End device certification allows users to implement the LTE910CF in their devices with no further North American carrier certification requirements

The **Verizon LTE910CF v6.00** Common Footprint (CF) Socket Modem is an LTE Category 1 Carrier end device certified 4G cellular modem. They utilize the Telit LE910-SV1 module as their cellular engine. The LTE910CF v6.00 units operate in LTE bands (B13), (B4), and (B2). End device certification allows users to implement the LTE910CF in their devices with no further North American carrier certification requirements.
