## European Embedded Cellular XF Footprint LTE910XF v12.00 CAT1 Socket Modem

### Description

The Janus line of “X” Footprint (XF) socket modems are footprint compatible cellular modems for use in LTE communication networks globally. They are carrier “end device certified” with industry standard 20-pin headers that are easily integrated into new and existing designs. Their “end device” classification allows users to integrate any certified cellular XF modem into their application with no further requirements, allowing for a quick to market solution. The XF modems are interchangeable to allow for maximum network flexibility while removing the worry of product obsolescence.

The LTE910XF v12.00 operates in LTE bands B1, B3, B7, B8 and B20 with fallback to 2G (GSM/GPRS/EDGE) 900 and 1800 MHz bands.
