

LTE910PS CARRIER RELEASE DATES

October, 2020

The new Janus LTE910PS POTSwap is currently undergoing carrier and regulatory testing.

¹We are projecting general availability for the various carriers as follows:

LTE910PS v1.00 (AT&T) Available now at Store

LTE910PS v3.00 (Verizon) - Availability September 2020*

* LTE910PS v3.00 is Verizon Approved. We are currently waiting for Verizon to assist with a required firmware update via FOTA. Units should ship in September.

LTE910PS V4.00 FirstNet. Certification is on hold pending a new firmware release.

We will continue certification work after a new firmware update is made available in Q4.

We are targeting for a Q1 2021 release.

LTE910PS V5.00 T-Mobile. Certification is on hold pending a new firmware release.

We will continue certification work after a new firmware update is made available in Q4.

We are targeting for a Q1 2021 release.

¹Subject to change

Janus Remote Communications is currently engineering a solution that will allow customers to upgrade their current 3G (HSPA and EVDO) POTSwaps to be compliant with 4G LTE Networks. The upgrades include new cellular modems and face-plates to conform to LTE network requirements.

Information on the 3G to 4G upgrades will be posted on the LTE POTSwap pages on the Janus website.
