Janus Remote Communications Announces the Release of their Terminus T3 Product Family

Aurora, IL – Janus Remote Communications, an industry leader in the design and manufacture of precision IoT products and solutions, is pleased to announce the release of their Terminus T3 product family.

The Terminus T3 products are low cost cellular terminals housed in compact, rugged aluminum enclosures. Powered by 5 Vdc and offering USB and Serial connectivity, the T3 allows for easy integration into any M2M/IoT application.

Incorporating carrier and PTCRB certified Janus Plug-in Modems, the T3 provides connectivity to the cellular network of your choice: GSM/GPRS, EDGE, UMTS, HSPA, EVDO, or LTE. External connectors allow the customer to choose the precise antennas for their application requirements.

Designed specifically for IoT/M2M applications, the T3 products are ideal for use in all remote monitoring applications including industrial machinery and equipment, vending, security, alarm monitoring, and e-maintenance.

Features

- Supports all 2G, 3G and 4G network standards
- Control via AT Commands
- Flexible power supply options
- Rugged aluminum enclosure
- Voltage Range: 4.75Vdc to 5.25Vdc
- Temperature Range: -40°C to +85°C

Pricing: $136 each at 1,000 units
