Janus Remote Communications Announce Verizon Certification of the Standard Terminus CDMA864D

Aurora, IL – Janus Remote Communications, a leader in M2M technology and services, in the areas of asset tracking, facility and energy monitoring and other commercial vertical industries, today announced that the CDMA864D Standard Terminus has received Verizon certification.

The Terminus CDMA864D is a dual band, CDMA-1xRTT wireless communication terminal specifically designed for worldwide M2M network deployment. The CDMA864D has 7 configurable GPIOs, 1 DAC, 1 ADC and an operating voltage of 7 to 26 VDC. USB or Serial UARTs can be used to communicate with the device.

“With this certification, end users have access to an all-in-one cellular communication terminal for use on Verizon networks expanding the potential market and opportunities with new and existing customers,” said Dave Jahr, general manager, Janus Remote Communications.

Cost effective and easy to implement, the CDMA864D is ideal for use in M2M telemetry and Telematics applications including fleet and asset management, vending, security, health and safety, alarm monitoring, e-maintenance and many telemetry applications.

“Janus Remote Communications’ module is a welcome addition to the certification portfolio as their CDMA864D passed our rigorous testing requirements,” said Aparna Khurjekar, Executive Director, Business Solutions Group, Verizon Wireless. “With M2M becoming so prominent in our business and daily lives, we are always looking for the best technologies for our customers. The other value proposition is that Verizon Wireless is committed to supporting the 2G network beyond 2020, and no other carrier can beat us in that longevity. “

About Janus

Janus Remote Communications provides state-of-the-art wireless products and services as well as custom design solutions for the global M2M marketplace; www.janus-rc.com. Janus solutions are widely used by customers in the areas of asset, process, facility and energy monitoring and control; health, safety and security; and in a whole host of commercial products. Janus solutions span the six pillars of M2M; remote monitoring, RFID, sensor networking, smart services, telematics and telemetry. Janus is a division of The Connor-Winfield Corporation www.conwin.com.
