## Janus Products Presentation

Plus - Introducing  
CellBridge™ – Our  
New Family of Global  
CAT-M1/NB2 Products

# What We Do

Janus Remote Communications provides state-of-the-art wireless products and services, including Custom Design Solutions to the global IoT marketplace

Our Products are most often used in: **Remote Monitoring Applications**

- Industrial
- Public Infrastructure
- Logistics
- Energy / Utilities
- Transportation
- Building / Construction
- Retail / Consumer

The Connor-Winfield Corporation is a privately held, US based electronic product manufacturer. After incorporation in 1963, Connor-Winfield focused primarily on designing and manufacturing quartz based timing circuits and oscillators for use in a wide variety of electronics applications. In the 1990's, Connor-Winfield expanded into other product areas while maintaining a continued focus on its core timing roots.

# JANUS REMOTE COMMUNICATIONS

## IoT Hardware and Solutions

# Janus Modems & Gateway Products

## Janus IoT Building Block Solutions

# Embedded Cellular Modems

## IoT Building Blocks

Janus continues to provide the most flexible, carrier-certified embedded solutions with our CF, XF and SMT embedded cellular devices. They provide quick and efficient integration into IoT applications.

- **Footprint Compatible Terminals**
- **Carrier Certified End Devices**
- **CF, XF and SMT footprints**
  - CF – Our Flagship Common Footprint Series
  - XF – Industry Standard 20 Pin Connector
  - SMT – 4G LGA Global Cellular Modem

# SMT Global LTE Embedded Modem

The Janus CellBridge SMT allows end users to assemble “end device” certified embedded cellular modems right onto application PCBs. No more hand assembly. No more modem pin connection issues in the field. Our CellBridge SMT units are designed to be placed during the primary pick & place assembly process, like all other primary BOM components.

- Janus SMT Platform (89-Pin LGA)
- Janus P/N LTE910SMT v1.00
- LTE CAT-M1/NB2 Firmware
- End Device Certified
- Telit ME310G1-WW (World Wide) Module
- Telit OneEdge Tools
  - Security
  - Connectivity
  - Management
  - Location
  - Application Processor

**CellBridge™**

# CF (Common Footprint) Overview

The Janus line of Common Footprint (CF) socket modems are PTCRB and carrier “end device” certified for use in all 2G, 3G, and 4G cellular communication network applications.

- PCB Mount
- Size: 2.5" x 1.4" x 0.325"
- Temp Range: -40°C to 85°C
- Input Voltage: 3.0 to 5.25Vdc
- LTE, HSPA+, EVDO, CDMA

**Carrier Certified  
End Products**

# CF Socket Modems Comparison (Common Footprint)

Specs / Parameter		LTE910CF CAT1 v15.00	LTE910CFX CAT1 v1.00 ThreadX	LTE910CF CAT-M1/NB2 v20.00
				
Power Supply	Input Voltage Range	4.75 - 5.25 Vdc	4.75 - 5.25 Vdc	4.75 - 5.25 Vdc
	Registered Idle Current Draw*	15mA	15mA	12mA
	Power Savings Current Draw*	2mA	2mA	0.05 to 1.0 mA (depends on paging cycle)

Audio	Audio Signal Voltage	1.8 Vdc	N/A	N/A

\* Average Current: may be higher in fallback modes.

# XF (X Footprint) Overview

The Janus line of XF\* embedded cellular modems, based on the industry standard 20-pin footprint, are specifically designed to provide customers with cost-effective products that are easily integrated into new and existing designs. The XF embedded footprint modems are available for all 2G, 3G, and 4G LTE networks worldwide.

- Industry Standard 20-pin Connector Footprint Design\*
- PCB Mount
- Size: 1.14" x 1.3" x 0.256"
- Temp Range: -40° C to 85° C
- Input Voltage: 3.4 to 5.5 Vdc
- LTE, HSPA+, EVDO, CDMA

**Carrier Certified  
End Products**

# Janus Socket Modems Applications

- Digital Remote Signage (especially construction)
- Parking Kiosks
- Trail Cameras
- Pipeline Monitoring
- Remote Environmental Monitoring
- Industrial Equipment

# Gateway and Terminal Products

## IoT Building Blocks

Janus provides a number of carrier certified enclosed gateways and terminals for customers to easily implement into their end applications. These products provide cost effective solutions for any technical challenges.

- **Serial, USB and Ethernet Connectivity**
- **Carrier Certified End Devices**
- **Rugged Enclosures**
- **-40 to 85°C Operating Temp**
- **Standard DC Voltage Inputs**
- **Linux, Python, C/C++**

# Janus T2 Gateway Terminus

## IoT Gateways – Pre-Certified

Our second generation Standard Terminus (T2) products are highly adaptable, cost-effective cellular gateways. Available in 2G, 3G, and 4G LTE cellular versions, the T2 products are ideal for use in all wireless applications that require processing power. External connectors allow the customer to choose the precise antenna for their application needs

- **Serial and USB (OTG) connectivity**
- **4-20 mA current loops**
- **Accelerometer**
- **Built in FPU**
- **Built in DSP**
- **Input Power Range of 7-28 VDC**
- **External Antenna Connectors**
- **Incorporates our Plug-In Modems**
- **Rugged Ryton Plastic Enclosure**

# Janus T2 Product Applications

- **Water Monitoring**
- **Trash Compactor Monitoring**
- **Security System Monitoring**
- **Custom Vehicle Tracking/Monitoring**
- **Elevator Monitoring**

# Terminus T3 Modem

## Hardware as a Solution

### High Performance at a Low Cost

Designed specifically for cost-sensitive modem applications, the Terminus T3 incorporates Janus Embedded Modems in a small metal housing with standard power, I/O, and antenna connections. The unit's low cost and outstanding features and functions make the Terminus T3 the device of choice for all cost sensitive terminal applications.

- Input voltage of 5 Vdc
- USB Connectivity
- RS-232 Serial Connectivity
- RS-485 Serial Connectivity

# Janus T3 Product Applications

- Simple Vehicle Tracking
- Power Line Monitoring
- Generator Monitoring
- Farm Equipment Monitoring
- Remote Weather Station Monitoring

# 400AP SBC Gateway Terminals

The Janus 400AP is a powerful, Single Board Computer with Cellular Technology housed in an aluminum enclosure. Available in 2G, 3G, and 4G LTE cellular versions, the 400AP products are ideal for use in all wireless applications that require advanced processing and robust connectivity. External connectors allow the customer to choose the precise antenna for their application needs.

- **Single Board Computer (SBC)**
- **Carrier certified, application ready**
- **Incorporates an ARM processor**
- **Flash & RAM Memory**
- **128 MB of NAND Flash**
- **64 MB of SDRAM**
- **Externally Exposed RS-232 & RS-485 Ports**
- **Two CAN Interfaces (2 Channel)**
- **Embedded GPS**
- **Four Exposed GPIOs**

**IoT Gateways – Pre-Certified**

# Janus 400AP Product Applications

- Electric vehicle monitoring and tracking
- Medical equipment data processing and telemetry
- Rental vehicle monitoring and tracking
- Utilities (water/Electric) monitoring and data processing
- Remote Industrial systems monitoring and control

# Janus Gateway Products Comparison

Modem	Voltage Range	Operating Temp	Network	MCU	OS	GNSS	GPIO	ADC	DAC	Dimension	Enclosure	Connectivity	Certifications
LTE910T3 v20.00	5 Vdc	-40° to 85°C	LTE CAT-M2/NB2	App. Processor	Telit AppZone	Yes	0	0	0	5.21 x 2.35 x 1.18"	Aluminum Enclosure	USB / Serial	PTCRB; AT&T Verizon; FCC IC; RED

The new Janus CellBridge family of Global CAT-M1/NB2 solutions provide our IoT customers with powerful new hardware, software and connectivity tools.

## Embedded Global CellBridge Products

**Based on the Telit ME310G1-WW and ME910G1-WW modules with OneEdge™ tools, CellBridge enclosed products assist customers in quickly and easily integrating “End Device” certified Cellular modems, Terminals and Gateways into their applications.**

## Enclosed Global CellBridge Products

## **Janus Global Embedded Products**

- **LTE310SMT v1.00 LGA SMT Embedded Modem**
- **LTE910CF v20.00 Common Footprint Embedded Modem**
- **LTE910CFX v1.00 CAT1 Common Footprint Embedded Modem**
- **LTE910XF v20.00 “X” Footprint Embedded Modem**
- **LTE910XFX v1.00 CAT1 “X” Footprint Embedded Modem**

## **Janus Global Enclosed Products**

- **LTE910T3 v20.00 T3 Enclosed Cellular Terminal**
- **LTE910T3X v1.00 CAT-1 Enclosed Cellular Terminal**
- **LTE910T2 v20.00 Enclosed Gateway with Cortex M4 Processing Power**
- **LTE910T2X v1.00 CAT-1 Enclosed Gateway with Cortex M4 Processing Power**
- **LTE400AP v20.00 Enclosed SBC with USB, Ethernet, Serial Connectivity**

# CellBridge™ – Telit OneEdge™

- **Telit IoT AppZone** can run code and applications directly inside the Telit module.
- **Lightweight M2M Protocol** enables comprehensive device management, FOTA updates and application enablement of low-power devices with the goal of more robust and secure connections.
- **Telit simWISE™**, a module-embedded SIM technology, enables reduced footprint, streamlined manufacturing and logistics, secure communications for connected devices.
- **Telit's Connection Manager** automates operations for connection to cellular networks.
- **Location Services** provide the position of devices even in the absence of a GNSS connection.

# SMT Global LTE Embedded Modem

# Who Uses Janus Products and Services

- Companies with little or no wireless experience – whose products or services would benefit from wireless connectivity
- Companies that require a quick and easy wireless implementation
- Companies with products that currently incorporate a wireless solution going into product redesign
- Companies with low volume demand that might not be able to achieve PTCRB, carrier, FCC, CE, or other certifications due to great expense
- Companies that might require engineering assistance

# General Information

## For Opportunities, who to contact:

Contact Gordon for standard products.

Contact Bill for custom products and higher volumes customers.

## How are samples and demos handled:

Contact Gordon for sample orders and demo loaners.

Per our policy, all loaned out equipment be returned in a timely manner for other customers.
