JANUS REMOTE COMMUNICATIONS OPENS EUROPEAN FACILITY

Aurora, IL – Janus Remote Communications, a leader in wireless M2M solutions, announces the opening of their new European sales and production headquarters in Shannon, Ireland, to support its expanding International customer base. The Shannon operation will provide Janus products, services and technical support to customers in Europe, the Middle East and Africa.

“The opening of Janus Remote Communications Europe demonstrates our strong desire to provide a more effective sales and customer support presence to markets and partners worldwide” says Paul Horan, Janus’ European sales manager.

“The new operations in Shannon will enable Janus to provide the high level of product quality and customer support and services associated with Janus to our expanding International clientele,” says Dave Jahr, general manager. “Janus has always been committed as an organization to gaining insight into emerging M2M product needs and designing cost-effective solutions to meet those specific needs.”

Janus offers the highly successful line of Terminus products, ready for immediate implementation into applications worldwide. For more information on standard Janus products, visit www.janus-rc.com.

About Janus Remote Communications

Janus Remote Communications is a major global provider of products, technical support and custom application solutions for the M2M marketplace. Janus solutions are widely used by customers in the areas of asset, process, facility and energy monitoring and control; health, safety and security; and in a host of industrial and commercial products. Janus solutions span the six pillars of M2M: remote monitoring, RFID, sensor networking, smart services, telematics and telemetry.

Janus Remote Communications is a division of Connor-Winfield Corp, a privately held business in the Chicagoland area. Connor-Winfield, which began in 1963, is an international company with diversified businesses engaged in electronic component manufacturing, software products, contract manufacturing, and the distribution of M2M OEM components and end user product solutions.
