Janus Remote Communications Announces AT&T Certification for their new GSM/GPRS Plug-In Terminus

Aurora, IL — Janus Remote Communications, a leader in the M2M (machine to machine) communication products and services, announced today that their PTCRB certified GSM865CF Plug-In GSM/GPRS modules achieved AT&T end product certification.

Adding to their highly successful line of cellular modems and terminal products, the Janus Plug-In Terminus modules now allow users to quickly and easily add AT&T cellular connectivity to any existing or new applications. The common footprint design affords users the option to change back and forth between cellular networks as their communication needs change.

The GSM865CF offers TCP/IP stack access via AT commands and full FOTA management capabilities. The 2.5" x 1.4" x 0.365" open frame "DIP Type" design has a operational temperature range of -40° to 80°C, sensitivity of ≤ -106 dBm and an input voltage range of 4.75 to 5.25 Vdc. The Terminus GSM865CF is ideal for use in fleet and asset management, security systems, telemetry, telematics, remote monitoring systems, remote meter reading, vending machines or any other M2M applications.

Janus currently supports three different network communication modules in their common footprint design: GSM/GPRS (2.5G), CDMA (3G), and UMTS (3G). Development is currently under way for an HSPA (4G) footprint compatible solution. Janus is proud to use Telit GSM/GPRS technology in the Terminus Plug-In modules.

For more information or to order the GSM865CF or any certified Janus devices, go to www.janus-rc.com

About Janus Remote Communications

Janus Remote Communications provides state-of-the-art wireless products and services as well as custom design solutions for the global M2M marketplace. Janus solutions are widely used by customers in the areas of asset, process, facility and energy monitoring and control; health, safety and security; and in a whole host of commercial products. Janus solutions span the six pillars of M2M; remote monitoring, RFID, sensor networking, smart services, telematics and telemetry. www.janus-rc.com. Janus is a division of The Connor-Winfield Corporation. www.conwin.com

About Telit

Telit Americas is a global leader in the field of M2M communications and develops, manufactures and markets M2M modules which enable machines, devices and vehicles to communicate via wireless networks. Telit offers stand alone devices to completely embedded systems. Janus Remote Communications not only partners with Telit, incorporating Telit products in Janus modules, but as a distributor for Telit products as well. www.telit.com
