Verizon Activation Notes for Janus POTSwap™

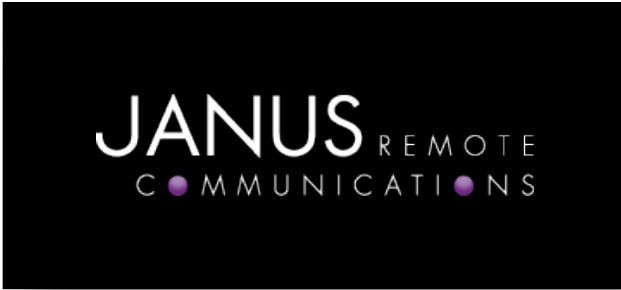

Janus - Your POTS Replacement Champion!

Verizon Device Name: POTSwap™

https://opendevelopment.verizonwireless.com/device-showcase/device/10981

Give this document to your Verizon Rep and have them confirm the following requirements for activation:

- **Machine to Machine Plans** (Do not used fixed plans)
  Plans **must** be provisioned with Offer Development before activation. Share Group 1 & 2, custom m2m plans require DACC codes to be built for Janus POTSwap GPO.
  Janus Recommends 50MB plan and voice minutes as needed.

- **Required SFO for Voice**
  81143   Access Advanced Calling
  81186   Access HD Voice
  81158   HD Voice
  68872   Call Delivery
  73733   Decline Voicemail
  54307   Block Text Messaging
  Critical Remove any voice blocks - This is a VoLTE device, requiring minutes for voice calls.

- **Voice Minutes** – The LTE910PS is a VoLTE voice device. Choose a plan that supports voice minutes suitable for your application.

- **Sim Cards** – Standard CAT1 Triple Punch (Rugged Micro 3FF also supported)

Activation Support: Verizon IoT Technical Support | Tier II – 800.525.0481
- You must provide **MTN** of **POTSwap device**
- Verify required SFOs are applied to each active line
