Janus Remote Communications Partners with Smart Technology Expert Axeda to Provide Smart Solutions for M2M Customers.

Aurora, IL – Janus Remote Communications, a leader in M2M integration products, today announced a new partnership with Axeda Corporation, the on-demand intelligent asset management company.

Using the Axeda Smartlink Platform, which provides system integrators, ISVs manufacturers and developers the foundation to build and deploy smart solutions with enterprise level scalability and proven security, Janus is able to provide all-in-one solutions for M2M asset tracking including a unified platform.

“Our highly experienced engineering team makes it easy for customer to take advantage of customized M2M applications” said Dave Jahr, director of business development, Janus Remote Communications. “Our partnership with Axeda provides customers with access to the Axeda SmartLink Platform though our wireless terminals — opening up opportunities for new business models.”

Additionally, Axeda is now able to offer its customers M2M solutions based on Janus’ PTCRB and carrier-certified Terminus, allowing them to immediately implement an asset-tracking platform.

About Janus

Janus Remote Communications provides state-of-the-art wireless products and services as well as custom design solutions for the global M2M marketplace. Janus solutions are widely used by customers in the areas of asset, process, facility and energy monitoring and control; health, safety and security; and in a whole host of commercial products. Janus solutions span the six pillars of M2M; remote monitoring, RFID, sensor networking, smart services, telematics and telemetry. www.janus-rc.com

About Axeda

Axeda is an on-demand intelligent asset management company that features the Axeda SmartLink Platform – a communications and hardware neutral solution enabling enterprises to connect, manage, service and track wired and wireless assets anywhere. The Axeda SmartLink Platform provides system integrators, ISVs, manufacturers and developers with the foundation to quickly build and deploy smart solutions with enterprise level scalability and proven security. It replaces disparate point solutions focused on vertical niches with a single unified platform for enterprise-wide applications.
